

Tamson Quang

TECHNICAL SKILLS

IT Support & Systems Administration: Windows desktop administration, macOS desktop administration, POS systems, endpoint troubleshooting, technical documentation, asset management, IT service desk operations

Enterprise Technologies: Single Sign-On (SSO) systems, mobile device management (MDM), endpoint protection, third-party integrations

Development & Database Management: Java, Python, SQL, Spring Boot, React, PostgreSQL, Git version control, software development lifecycle, database administration

Customer Service & Communication: Technical issue resolution, end-user support, stakeholder communication, conflict resolution, professional service delivery

Administrative Operations: Data entry, recordkeeping, compliance documentation, inventory management, security protocols, policy implementation

EXPERIENCE

Infosys Limited — Associate Jan 2026 – Present

- Collaborated with cross-functional teams to match technical skills with client needs
- Engaged with client stakeholders to understand project requirements and technical skill alignment
- Completed structured upskilling programs in Java, Spring Boot, SQL, Javascript, Html/CSS, and React.

Revature — Full-Stack Developer May 2025 – Nov 2025

- Built Java and Spring Boot applications, applying software development lifecycle (SDLC) practices in team projects with 15+ peers
- Designed and optimized SQL queries using PostgreSQL, improving query response times by 40% across multiple datasets
- Applied Git version control for collaborative code development, aligning with modern CI/CD workflows

Correlation One — Cybersecurity Associate June 2024 - November 2024

- Implemented ETL-style processes by extracting and transforming log data from 5+ sources into centralized platforms for analysis
 - Applied data validation, error handling, and optimization techniques to ensure integrity and performance of ingested data
 - Gained exposure to cloud-based monitoring and security controls, reinforcing knowledge of data governance in distributed systems
-

EDUCATION

University of Massachusetts Amherst — Bachelor of Science in Electrical and Computer Engineering, *Graduated: Feb 2024*

CERTIFICATIONS

CompTIA Security+: Issued Nov. 2024 by CompTIA, ID: COMP001022649431

Python, Bash and SQL Essentials: Issued April 2025 by Duke University, ID: <https://coursera.org/verify/specialization/L5Q0V214PY75>

ACADEMIC PROJECTS

Spring Boot Enterprise Application Development

- Architected and deployed a full-stack web application using Spring Boot, handling 100+ concurrent users and demonstrating 99.5% uptime reliability
- Implemented database management with PostgreSQL, optimizing queries to improve response times by 40% and managing 1,000+ data records
- Utilized version control systems (Git) for collaborative development and code management practices

Spring Boot Movie Project

- Designed and Managed RDBS for user accounts, movies, and reviews regarding movies
- Used Spring Boot to initialize and set up an MVC architecture
- Integrated react to construct a seamless application
